Layout & Levels

With our "Layout & Levels" you can rebuild your physical environment to localize your devices and compare process performance. Setup the hierarchy of your processes and define the level to your needs. You can set your layout on a station, on a location and even on a company-wide view.

Layout & Levels

This App is an indispensable companion for your workforce on the shop floor. Easy to integrate and easy to use, with capabilities that align worker safety and well-being with process optimization. Upgrade your glove scanners for unparalleled results!
